

## **SELEX Sistemi Integrati: Completion of Increment 1 of the EUCCIS (European Union Command and Control Information System)**

On the 29th June 2009, in the context of the implementation of the European Union Command and Control Information System (EUCCIS) by SELEX Sistemi Integrati for the General Secretariat of the Council of the European Union, acceptance of Increment 1 of EUCCIS contract was issued.

The contract was signed 18 months ago by SELEX Sistemi Integrati, a Finmeccanica Company, and the General Secretariat of the Council of the European Union. Within the contract, the Italian Company provides the development, supply, installation of a Command and Control Information System, including the provision of related support, training and maintenance services to enhance the European Union's ability to plan, deploy and execute military as well as civilian operations under EU-led undertakings.

EUCCIS is an information system composed of centralised applications, deployed on a network, accessible from the EU Military/Civilian Staff user workstations and it is composed by a stable instance located in Brussels with the flexibility to be deployed everywhere in the world within a subordinated deployed Headquarter. It provides graphical user interface to manage cartography, data, documents and scenario operation symbols utilised in the operation planning, management and monitoring activities.

The Increment 1 provides about 50% of the functionality of the system. The remaining two increments (25% for each one) will grant the complete functionality.

SELEX Sistemi Integrati considers EUCCIS a strategic products and intends to continue to invest the best resources in such product considered one of the core elements for homeland defence systems of systems.
