SELEX Sistemi Integrati: Air Traffic Control Systems sold in Romania

SELEX Sistemi Integrati, a Finmeccanica company, signed a contract worth over 11 million Euros with the Romanian Air Traffic Services Administration (ROMATSA).

The supply includes the software upgrading of all the systems installed in the air traffic control centres of Bucharest, Arad, Constantia and in 14 airport towers all over Romania.

All the systems already installed by SELEX Sistemi Integrati, have been working since the end of 2003.

The equipments will be delivered in four phases, starting from January 2009 and ending in May 2011.

The software upgrading will include the supply of innovative functions which will allow the enhancing of security levels all over the Romanian air space, in line with the latest Eurocontrol (European Organisation for the Safety of Air Navigation) standards.

In Romania since 1991, during the years SELEX Sistemi Integrati has realised the main infrastructure of air traffic control systems, made of radar and control centres, for a total amount of 83 million Euros.
